Safety Lord

FullFend **FullFend⁺**
3/4 COATING

FullFend is developed for employees who perform rough work in moderately greasy environments. FullFend is produced with double-layer knitting technology which allows for a nylon interlining for sweat transfer and high comfort and a polyester outer surface for increased durability.

While maximizing your operating speed thanks to its superior comfort, the durable structure of FullFend makes it the primary choice of companies that do not want to invest in disposable gloves with its durable structure.

Easy put on and take off			Customized yarn for FullFend
360° breathability on all surfaces			Double-layer knitting technology
Antiperspirant			Pre-washed prior to packaging
Climatic comfort with swift heat transfer			Odour free
Touch-screen friendly			Maximum flexibility

- We knit our gloves with the best quality yarns in the world.
- We use a special coating formula.
- We value your employees as much as you do and we pre-wash our gloves prior to packaging.
